Why do some leaders get and accomplish what they want as a matter of routine, while others seem to regularly experience frustration and setbacks? Why do some leaders achieve their goals and reach new heights, while others barely "hang in there" and survive? Based on his groundbreaking psychological study of the ways that successful individuals think and behave, Dr. Henry Cloud presents a simple yet profound roadmap to help leaders—and those who want to become leaders—arrive at greater levels of personal growth and corporate influence than they

previously thought were possible. The good news for all of us is that leadership success is not limited to vague notions of "charisma" nor traditional advantages like graduate degrees and connections, but much more to a pattern of thinking and moving forward that learns from mistakes and stays focused on goals.

What worked in the past won't work in the future. We need to know how to prepare leaders who can successfully navigate and guide us through the next decade and beyond. How is leadership changing, and why? How ready are leaders today for these changes? What should leaders do now? Leaders of the future will face the gap that exists between what CEOs identified versus what employees are actually experiencing. Become a future-ready leader. This is the book that you, your team, and your organization must read in order to lead in the future of work.

You may not hold a position of leadership or think of yourself as a leader. But if you want to create, change, or impact the world around you—even in a modest way—then you're guided by a leader's impulse and shaped by a leader's principles. You are an aspiring leader. But the fact is that you've

come to this role at a time when leadership—like everything else—is rapidly changing...and too many leaders are addressing the problems of today and tomorrow with the style and substance of yesterday's leadership. We need an update. In *The Aspiring Leader's Guide to the Future*, Clay Scroggins (author of *How to Lead When You're Not in Charge*) explores nine new principles of leadership that will help leaders adapt to a changing world and work culture, such as: Today's leaders lean into vulnerability. Today's leaders develop relationships primarily

around trust. Today's leaders celebrate the successes of others. These may seem like counter-intuitive principles, but they provide a new way forward for leaders and teams and will prove versatile in the event of change and durable in the face of conflict. With humor and a pastor's candor, Clay will show you why the old ways need updating and what developing new leadership skills could look like for your future. To be clear, the author of this book does not know the future. If he did, he would have used his talents on sports betting or stock trading. What he does

To The Next Level and Take

know is that yesterday's leadership axioms are today's myths and what that means. The way forward requires an understanding of the past, a conviction of what's at stake today, and a vision for how different tomorrow will be. You don't have to be a young entrepreneur with big dreams or someone looking to land a leadership role just to be considered an aspiring leader. You are one now. And by developing your skills for the future, you can become today's version of a leader worth following.

The inspiring, life-changing bestseller by the author of *LEADERS EAT LAST* and *TOGETHER IS BETTER*. In 2009, Simon Sinek started a movement to help people

become more inspired at work, and in turn inspire their colleagues and customers. Since then, millions have been touched by the power of his ideas, including more than 28 million who've watched his TED Talk based on START WITH WHY -- the third most popular TED video of all time. Sinek starts with a fundamental question: Why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so

few able to repeat their success over and over?

People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who've had the greatest influence in the world all think, act, and communicate the same way -- and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which

organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.
