Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

In this painstakingly updated and comprehensive political masterpiece, Charles Nnsemeka Akujize explores Nigeria’s pre-colonial, colonial and postcolonial history and current affairs in Nigeria politics and administration and presents a nuanced explanation of events and circumstances that have dangerously flung this complex, dynamic and troubled giant to the brink. It is one of the most updated and comprehensive analysis of Africa’s most important and populous nation that has been undermined, in recent decades, by ethnic and religious conflict, political instability, rampant corruption and an ailing economy.

Globalizing Confederation brings together original research from 17 scholars to provide an international perspective on Canada’s Confederation in 1867. In seeking to ascertain how others understood, constructed or considered the changes taking place in British North America, Globalizing Confederation unpacks a range of viewpoints, including those from foreign governments, British colonies, and Indigenous peoples. Exploring perspectives from the Austro-Hungarian Empire, France, Latin America, New Zealand, and the Vatican, among others, as well as considering the impact of Confederation on the rights of Indigenous peoples during this period, the contributors to this collection present how Canada’s Confederation captured the imaginations of people around the world in the 1860s. Globalizing Confederation reveals how some viewed the 1867 changes to Canada as part of a reorganization of the British Empire, while others contextualized it in the literature on colonization more broadly, while still others framed the event as part of a re-alignment or power shift among the Spanish, French and British empires. While many people showed interest in the Confederation debates, others, such as South Africa and the West Indies, expressed little interest in the establishment of Canada until it had profound effects on their corners of the global political landscape.
