In *Chocolate Surrealism*, Njoroge Njoroge highlights connections among the production, performance, and reception of popular music at critical historical junctures in the late nineteenth and twentieth centuries. The author sifts different origins and styles to place socio-musical movements into a larger historical framework. Calypso reigned during the turbulent interwar period and the ensuing crises of capitalism. The Cuban rumba/son complex enlivened the postwar era of American empire. Jazz exploded in the Bandung period and the rise of decolonization. And, lastly, Nuyorican Salsa coincided with the period of the civil rights movement and the

beginnings of black/brown power. Njoroge illuminates musics of the circum-Caribbean as culturally and conceptually integrated within the larger history of the region. He pays close attention to the fractures, fragmentations, and historical particularities that both unite and divide the region's sounds. At the same time, he engages with a larger discussion of the Atlantic world. Njoroge examines the deep interrelations between music, movement, memory, and history in the African diaspora. He finds the music both a theoretical anchor and a mode of expression and representation of black identities and political cultures. Music and performance offer ways for the author to re-theorize the intersections of race, nationalism and musical practice, and geopolitical connections. Further music allows Njoroge a reassessment of

the development of the modern world system in the context of local, popular responses to the global age. The book analyzes different styles, times, and politics to render a brief history of Black Atlantic sound.

From chants and pamphlets to the Internet, terrorist propaganda can be deadly effective Propaganda used by terrorists and armed groups might not always be the most sophisticated or nuanced form of rhetoric, but with the right mix of emotion and logic it can be extremely effective in motivating supporters and frightening opponents. This book examines how terrorist groups in recent history have used propaganda, and how they had adapted to new communications technologies while retaining useful techniques from the past. Harmon and Bowdish trace how

armed groups and terrorists around the globe have honed their messages for maximum impact, both on the communities they hope to persuade to support them and on the official state organs they hope to overthrow. Sometimes both the messages and the techniques are crude; others are highly refined, carefully crafted appeals to intellect or emotion, embracing the latest forms of communications technology. Whatever the ideas or methodology, all are intended to use the power of ideas, along with force, to project an image and to communicate—not merely intimidate. The Terrorist Argument uses nine case studies of how armed groups have used communications techniques with varying degrees of success: radio, newspapers, song, television, books, e-magazines, advertising, the Internet, and social media. It is
