The Time Lords have a mission for the Doctor. Together with Sarah and Harry, he finds himself stranded on the war-torn planet Skaro where the conflict between the Thals and the Kaleds has been raging for a thousand years. Chemical and biological weapons have started a cycle of mutation among the planet's inhabitants that cannot be stopped. But Kaled scientist Davros has perfected a life support

system and travel machine for the creature he knows his race will ultimately evolve into - the Dalek. The Doctor must stop the creation of the Daleks, or perhaps affect their development so they evolve into less aggressive creatures. But with Davros's plans to destroy the Thals and to wipe out any dissenters among his own ranks in progress, is the Doctor already too late? This novel is based on a Doctor Who story which was originally broadcast from 8 March-12 April 1975. Featuring the Fourth Doctor as played by Tom Baker with his companions Sarah Jane Smith and Harry Sullivan

author Robin Cook. When the body of social worker Kera Jacobsen shows up on Chief New York City Medical Examiner Laurie Montgomery's autopsy table, it appears she was the victim of a drug overdose. But for Laurie and her new pathology resident, the brilliant Dr. Aria Nichols, little things aren't adding up. Kera's family and friends swear she never touched drugs. Administrators from the hospital where Kera worked insist the case be shrouded in silence. And although Kera was ten weeks pregnant, nobody knows who the father was--or what he might now about Kera's final moments alive. With Laurie

Forming a twenty-first-century statement on Darwinian evolution, one shorn of "religious and political dogma," Edward O. Wilson offers a bold work of scientific thought and synthesis. Asserting that religious creeds and philosophical questions can be reduced to purely genetic and evolutionary components, and that the human body and mind have a

physical base obedient to the laws of physics and chemistry, Genesis demonstrates that the only way for us to fully understand human behavior is to study the evolutionary histories of nonhuman species. Of these, Wilson demonstrates that at least seventeen—among them the African naked mole rat and the sponge-dwelling shrimp—have been found to have advanced societies based on altruism and cooperation. Whether writing about midges who “dance about like acrobats” or schools of anchovies who protectively huddle “to appear like a gigantic fish,” or proposing that human society owes a debt of

gratitude to "postmenopausal grandmothers" and "childless homosexuals," Genesis is a pithy yet path-breaking work of evolutionary theory, braiding twenty-first-century scientific theory with the lyrical biological and humanistic observations for which Wilson is known.
