Flora of East Tropical Africa is the largest regional tropical flora ever created. Documenting all known wild plants from Tanzania, Uganda, and Kenya, the project received contributions from many botanists. Work began in the 1940s and was completed in 2012. Containing over 12,000 entries, it documents between 3 and 4 percent of known plant species in the world.

This book is a comprehensive review of the genera of Moraceae, a family of flowering plants, found in the tropical region of East Africa. It presents information on their character, occurrence, habitat, phenotypic variations and distribution of each of the species under these genera.

The flora is prepared at Royal Botanic Gardens, Kew, in close collaboration with East African Herbarium and in liaison with the University of Dar es Salaam, the University of Nairobi and the Makerere University. Significant contributions are also made by specialists elsewhere. The flora is designed to a high academic standard and should be a useful resource reference for anyone concerned with the identification and utilization of plants in eastern Africa. Each family is published as a separate part.

A descriptive account of the Ulmaceae native and naturalised in Kenya, Tanzania and Uganda.

First published in 1991. CRC Press is an imprint of Taylor & Francis.

The Flora of Tropical East Africa prepared at the Royal Botanic Gardens/Kew with the assistance from the East African Herbarium. A volume looking at the considerable family of around 2000 species (three-quarters herbs and subshrubs and the rest trees and shrubs).

Being a descriptive account of the flowering plants and ferns native and naturalised in Kenya, Tanzania and Uganda, together with information on exotic ornamental and crop plants. Prepared at the Royal Botanic Gardens, Kew in co-operation with the East African Herbarium, the National Herbarium of Tanzania, and the Herbaria of Makerere University and Dar es Salaam University.

"The flora is prepared at Royal Botanic Gardens, Kew, in close collaboration with East African Herbarium and in liaison with the University of Dar es Salaam, the University of Nairobi and the Makerere University. Significant contributions are also made by specialists elsewhere. The flora is designed to a high academic standard and should be a useful resource reference for anyone concerned with the identification and utilization of plants in eastern Africa. Each family is published as a separate part."--Provided by publisher.
