What goes into the making of Hollywood's greatest motion pictures? Join the authors as they examine recent screenplays on their perilous journey from script to screen.

Covers character design, bar sheets, track analysis, layouts, dialogue, music, animation photography, computer animation, and budgeting

The Collaborative Art of Filmmaking: From Script to Screen explores what goes into the making of Hollywood's greatest motion pictures. Join veteran script consultant Linda Seger as she examines contemporary and classic screenplays on their perilous journey from script to screen. This fully revised and updated edition includes interviews with over 80 well-known artists in their fields including writers, producers, directors, actors, editors, composers, and production designers. Their discussions about the art and craft of filmmaking – including how and why they make their decisions – provides filmmaking and screenwriting students and professionals with the ultimate guide to creating the best possible "blueprint" for a film and to also fully understand the artistic and technical decisions being made by all those involved in the process.

For the first time ever, the epic, in-depth story of the creation of one of the most famous fantasy worlds ever imagined—an illustrious compendium that reveals the breathtaking craftsmanship, artistry, and technology behind the magical Middle-earth of the blockbuster film franchises, The Lord of the Rings Motion Picture Trilogy and The Hobbit Trilogy, directed by Peter Jackson. The Making of Middle-Earth tells the complete story of how J. R. R. Tolkien's magic world was brought to vivid life on the big screen in the record-breaking film trilogies The Lord of the Rings Motion Picture Trilogy and The Hobbit Motion Picture Trilogy. Drawing on resources, stories, and content from the archives of the companies and individuals behind the films, much of which have never appeared in print before, as well as interviews and a foreword by director Peter Jackson and key members of the Art Department, Shooting Crews, Park Road Post, and Weta Digital teams who share their personal insights on the creative process, this astonishing resource reveals: How the worlds were built, brick by brick and pixel by pixel; How environments were extended digitally or imagined entirely as computer generated spaces; How the multiple shooting units functioned; How cast members and characters interacted with their environments. Daniel Falconer takes fans from storyboard concepts to deep into the post-production process where the films were edited, graded, and scored, explaining in depth how each enhanced the films. He also discusses how the processes involved in establishing Middle-earth for the screen have evolved over the fifteen years between the start and finish of the trilogies. Going region by region and culture by culture in this fantasy realm, The Making of Middle-Earth describes how each area created for the films was defined, what made it unique, and what role it played in the stories. Illustrated with final film imagery, behind-the-scenes pictures and conceptual artwork, including places not seen in the final films, this monumental compilation offers unique and far-reaching insights into the creation of the world we know and love as Middle-earth.

Text and illustrations describe the equipment, budgeting, directing, and editing techniques, and other aspects of film production for beginners.

Filmmaking the definitive resource for filmmakers, blows the doors off the secretive film industry and shows you how to adapt the Hollywood system for your production. Full of thousands of tips, tricks, and techniques from Emmy-winning director Jason Tomaric, Filmmaking systematically takes you through every step of how to produce a successful movie - from developing a marketable idea through selling your completed movie. Whether you're on a budget of \$500 or \$50 million, Filmmaking reveals some of Hollywood's best-kept secrets. Make your movie and do it right. The companion site includes:

Over 30 minutes of high-quality video tutorials featuring over a dozen working Hollywood professionals. Industry-standard forms and contracts you can use for your production Sample scripts, storyboards, schedules, call sheets, contracts, letters from the producer, camera logs, and press kits 45-minute video that takes you inside the movie that launched Jason's career. 3,000 extras, 48 locations, 650 visual effects-all made from his parent's basement for \$25,000.

Making movies is the most exciting way to earn a living and it is not surprising that media and film studies remain the most popular courses at colleges across the western world. A short film provides an opportunity for elliptical, poetic, condensed story telling. Shorts can take risks rarely seen in features. It is the arena where a strong voice or individual vision is possible; an invitation for experimentation and originality. Making Short Films, 3rd edition is entirely revised and restructured, providing a much more complete and detailed guide to filmmaking, with more information on new technology, illustrations and ideas for best practice.

An essential resource to help you master the craft and connect you with the world of screenwriting.
