The Heritage of World Civilizations, Tenth Edition is also available via REVEL™, an immersive learning experience designed for the way today's students read, think, and learn.

This two-volume compilation of primary sources in world civilization is based around eight major themes to provide direction and cohesion to the text. Designed to involve students with important historical questions and controversies, the text promotes thoughtful comparisons between world societies that are linked to common problems, events or themes within the same time period and across chronological divisions. Broad in scope, the text incorporates a wide variety of political, social, economic, religious, intellectual and scientific issues, and is designed to help students consider historical questions and concerns.

This comprehensive, accessible survey of world history has been extensively revised to provide an even more global and comparative perspective on the events and processes that have shaped our increasingly interdependent world. Written by leading scholars in their respective fields. Interactive maps—one Web-based interactive map in each chapter—provides readers with opportunities to explore the relationships between time and space in shaping world history. Volume 1 covers the period to 1700. The Sixth edition now provides roughly the same amount of coverage for European and non-European regions. Combines unusually strong and thorough coverage of the unique heritage of Asian, African, Islamic, Western, and American civilizations, while highlighting the role of the world's great religious and philosophical traditions. For anyone interested in world civilization or world history.

Accompanying CD-ROM in v. 2 contains over 200 documents.
