In summary, this fourth edition of Wall and Melzack ' s classic text remains the authoritative and comprehensive review of pain and analgesia. It should be in the library of every department of anesthesiology, and, although it is very big and expensive, I believe it belongs on the shelf of any laboratory or clinic studying and treating patients with pain.

Pain is multifactorial and affects the whole person and family caregivers, and multiple barriers to pain assessment exist. Patients should be screened for pain on admission to a hospital, clinic, nursing home, hospice, or home care agency. If pain or discomfort is reported, a comprehensive pain assessment should be performed at regular intervals, whenever there is a change in the pain, and ...
