The Ethical Carnivore addresses this universal question, through an emotional personal quest. Taking the current fashion for "ethical meat" to its logical conclusion, Louise vows to eat only animals she has killed herself for a year. Starting small, Louise shoots and traps game such as hare and squirrels, and learns how to skin and cook them.

took this modern-day maxim to its logical conclusion and only ate animals you killed yourself? Louise Gray decides to be an ethical carnivore and learn to stalk, shoot and fish. Starting small, Louise shucks oysters and catches a trout. As she begins to reconnect with nature, she befriends countrymen and women who can teach her to shoot pigeons, rabbits and red deer. Louise begins to look into how meat is processed, including the beef in our burgers, cheap chicken, supermarket bacon and farmed fish. She investigates halal slaughter and visits abattoirs to ask whether new technology can make eating meat more humane. Delving into alternative food cultures, Louise finds herself sourcing roadkill and cooking a squirrel stir-fry, and she explores eating other sources of protein like in vitro meat, insects and plant-based options.

With the global demand for meat growing, Louise argues that eating less meat should be an essential part of fighting climate change for all of us. Her writing on nature, food and the environment is full of humour, while never shying from the hard facts. Louise gets to the heart of modern anxieties about where our meat comes from, asking an important question for our time – is it possible to be an ethical carnivore?

If we want to improve the treatment of animals, Dominique Lestel argues, we must acknowledge our evolutionary impulse to eat them and we must expand our worldview to see how others consume meat ethically and sustainably. The position of vegans and vegetarians is unrealistic and exclusionary. Eat This Book calls at once for a renewed and

vigorous defense of animal rights and a more open approach to meat eating that turns us into responsible carnivores. Lestel skillfully synthesizes Western philosophical views on the moral status of animals and holistic cosmologies that recognize human-animal reciprocity. He shows that the carnivore's position is more coherently ethical than vegetarianism, which isolates humans from the world by treating cruelty, violence, and conflicting interests as phenomena outside of life. Describing how meat eaters assume completely—which is to say, metabolically—their animal status, Lestel opens our eyes to the vital relation between carnivores and animals and carnivores' genuine appreciation of animals' life-sustaining flesh. He vehemently condemns factory farming and the terrible footprint of

industrial meat eating. His goal is to recreate a kinship between humans and animals that reminds us of what it means to be tied to the world.

A vegan-turned-hunter reignites the connection between humans and our food sources and continues the dialog begun by Michael Pollan and Barbara Kingsolver. While still in high school, Tovar Cerulli experimented with vegetarianism and by the age of twenty, he was a vegan. Ten years later, in the face of declining health, he would find himself picking up a rifle and heading into the woods. Through his personal quest, Tovar Cerulli bridges disparate worldviews and questions moral certainties, challenging both the behavior of many hunters and the illusion of blamelessness maintained

by many vegetarians. In this time of intensifying concern over ecological degradation, how do we make peace with the fact that, even in growing organic vegetables, life is sustained by death? Drawing on personal anecdotes, philosophy, history and religion, Cerulli shows how America's overly sanitized habits of consumption and disconnection with our food have resulted in so many of the health and environmental crises we now face.

teaches her a lesson, and when she subsequently finds the rabbit, she vows to do its death justice by finding out what it really means to kill and eat animals. Many people claim to care about the meat that they eat, but do they really know how the animal died? The Ethical Carnivore addresses this universal question, through an emotional personal quest. Taking the current fashion for “ethical meat” to its logical conclusion, Louise vows to eat only animals she has killed herself for a year. Starting small, Louise shoots and traps game such as hare and squirrels, and learns how to skin and cook them. She builds a new appreciation of the British countryside, and its wild fish and animals. The narrative moves to domestic animals. Louise sees cows in the slaughterhouse; by talking to the men and women who work

there, she finds out how the animals are killed and the effect it has on the people who do it on our behalf.. At the end of her journey, Louise goes wildfowling in the Orkneys to shoot a goose for Christmas dinner. She reflects that the rabbit with the white blaze has taught her to appreciate meat by facing up to the death of animals and to look deeply at her own morals and values.

we have for dinner? Ten years ago, Michael Pollan confronted us with this seemingly simple question and, with *The Omnivore's Dilemma*, his brilliant and eye-opening exploration of our food choices, demonstrated that how we answer it today may determine not only our health but our survival as a species. In the years since, Pollan's revolutionary examination has changed the way Americans think about food. Bringing wide attention to the little-known but vitally important dimensions of food and agriculture in America, Pollan launched a national conversation about what we eat and the profound consequences that even the simplest everyday food choices have on both ourselves and the natural world. Ten years later, *The Omnivore's Dilemma* continues to transform the way Americans think about the

book that challenges both vegans and carnivores in the battle for a new ethics of eating. This book will leave you surprised, engrossed and sometimes shocked - whatever your food choices.' Richard Glover How can 160,000 deaths in one day constitute a 'medium-sized operation'? Think beef is killing the world? What about asparagus farms? Or golf? Eat dairy? You'd better eat veal, too. Going vegan might be all the rage, but the fact is the world has an ever-growing, insatiable appetite for meat - especially cheap meat. Former food critic and chef, now farmer and restaurateur Matthew Evans grapples with the thorny issues around the ways we produce and consume animals. From feedlots and abattoirs, to organic farms and animal welfare agencies, he has an intimate, expert understanding of the farming practices that take place

in our name. Evans calls for less radicalisation, greater understanding, and for ethical omnivores to stand up for the welfare of animals and farmers alike. Sure to spark intense debate, *On Eating Meat* is an urgent read for all vegans, vegetarians and carnivores.

Everyone is talking about food. Chefs are celebrities. "Locavore" and "freegan" have earned spots in the dictionary. Popular books and films about food production and consumption are exposing the unintended consequences of the standard American diet. Questions about the principles and values that ought to guide decisions about dinner have become urgent for moral, ecological, and health-related reasons. In *Philosophy Comes to Dinner*, twelve

philosophers—some leading voices, some inspiring new ones—join the conversation, and consider issues ranging from the sustainability of modern agriculture, to consumer complicity in animal exploitation, to the pros and cons of alternative diets.

Our future diet will be shaped by diverse forces. It will be shaped by novel technologies and the logic of globalisation, by geopolitical tensions and the evolution of cultural preferences, by shocks to the status quo - pandemics and economic strife, the escalation of the climate and ecological crises - and by how we choose to respond. It will also be shaped by our emotions. It will be shaped by the meat paradox. 'Should we eat animals?' was, until recently, a

question reserved for moral philosophers and an ethically minded minority, but it is now posed on restaurant menus and supermarket shelves, on social media and morning television. The recent surge in popularity for veganism in the UK, Europe and North America has created a rupture in the rites and rituals of meat, challenging the cultural narratives that sustain our omnivory. In *The Meat Paradox*, Rob Percival, an expert in the politics of meat, searches for the evolutionary origins of the meat paradox, asking when our relationship with meat first became emotionally and ethically complicated. Every society must eat, and meat provides an important source of nutrients. But every society is moved by its empathy. We must all find a way of balancing competing and contradictory imperatives. It is essential reading for anyone interested in
