~~SediVue Dx Veterinary Urine
Sediment Analyser – IDEXX UK~~
urine sediment examination.
This is the final stage of a
complete urinalysis. It can
confirm suspected findings
from earlier stages of the
analysis as well as
facilitate visual inspection
of structures in the sample
e.g. casts, cells or
crystals. Before examining
the sediment the urine must
be centrifuged or "spun
down" to concentrate the
sample. This process will
separate the sample into two
parts: the supernatant and
the sediment.

SediVue Dx Urine Sediment Analyser The new standard for urine sediment analysis. Delivers consistent, accurate results in approximately three minutes* from only 165 µl (four-five drops) of fresh uncentrifuged urine. Examines the equivalent of 45 high-power fields, then identifies and classifies elements within the sediment.
